

APESreview Ch 9-11: Sustaining Biodiversity

Top 15 Terms for This Exam

Tree Harvesting Techniques
Endangered Species Act
Industrial Forestry
Marine Protected Areas
Bycatch
Keystone Species
Extinction
CITIES

Fish Harvesting Techniques
Biophilia
Endangered Species
Introduced Species
Threatened Species
Forest Fires
Overgrazing

The Gimme Question for This Exam

Nontarget fish species or other marine mammals caught in nets or through other fishing methods are called

- bycatch
- surplus species
- trash fish
- game species

College Board Objectives

STB-3.J. Describe the effects of bioaccumulation and biomagnification.
EIN-4.A. Explain the environmental problems associated with invasive species and strategies to control them.
EIN-4.B. Explain how species become endangered and strategies to combat the problem.
EIN-4.C. Explain how human activities affect biodiversity and strategies to combat the problem.
ERT-2.B. Describe ecosystem services.
ERT-2.C. Describe the results of human disruptions to ecosystem services.
EIN-2.B. Describe the effect of clearcutting on forests.
EIN-2.J. Describe causes of and problems related to overfishing.
STB-1.G. Describe methods for mitigating human impact on forests.
STB-3.E. Describe the impacts of human activity on wetlands and mangroves.
EIN-4.C. Explain how human activities affect biodiversity and strategies to combat the problem.
