

An Inconvenient Truth

Much of the science in the film is based on the work of the IPCC (Intergovernmental Panel on Climate Change), a group of over 2,500 leading scientists from over 130 countries. In 2007, the IPCC shared the Nobel Peace Prize with Al Gore for their work on the issue of climate change.

Answer the following questions within your (400 word) discussion of the 2006 film “An Inconvenient Truth”

1. Discuss the relationship between CO₂ and atmospheric temperature.
2. Differentiate the greenhouse effect and global warming and explain the relationship between the two. Identify sources of anthropogenic warming.
3. Compare and contrast how climate change might affect people in developed and developing countries.
4. Discuss the pros and cons of having a political figure as the messenger in the film. How might the films reception be different with another narrator?
