

# Mastery Opportunity – Meteorology

Mastery assignments are optional, but are due on the day of the test.  
Choose any two of the following four assignments.

## Option 1:

Create a weather map of the United States that shows the following:

- Cold front traveling NE over Tennessee
- Warm front traveling SW over Utah
- Stationary front over Raleigh, NC
- Occluded front traveling SE over Texas

## Option 2:

Create 4 sketches: Mountain Breeze  
Valley Breeze, Land Breeze, Sea Breeze

1. Label each type.
2. Show the direction of air movement within each diagram
3. Label where the warm air goes AND where the cooler air comes in.

## Option 3:

Create a story that revolves around a main character on a rocketship moving up through Earth's atmosphere.

You must address:

- Each of the layers of the atmosphere that is passed through
- What happens to the temperature at each layer
- What altitude is associated with each layer

## Option 4:

Create a travel brochure for one of the major biomes that we covered. It must include:

- Characteristics of the climate (temp & precip)
- Picture (clip-art or drawn) of that biome
- List of animals found there and the adaptations that help them survive in that area
- List of plants found there and the adaptation that help them survive
