

Mastery Opportunity – Human Impact

Mastery assignments are optional, but are due on the day of the test.
Choose any two of the following four assignments.

Option 1:

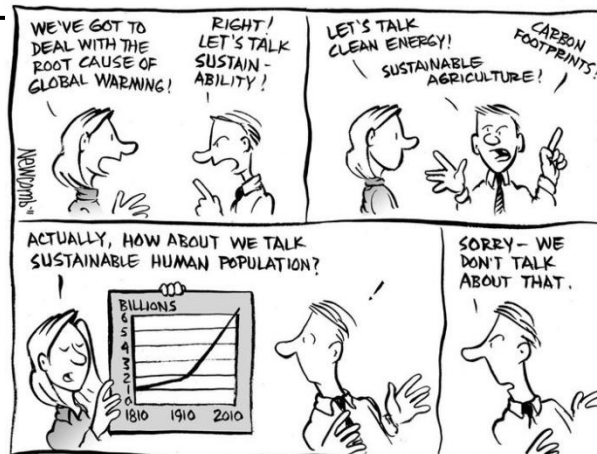

Pick an endangered species (truly classified as endangered) and create a cartoon strip that shows how it became endangered.

Include the following:

1. Name of species
2. Drawing/photo
3. Where it can be found / habitat
4. What led to it becoming endangered
5. What is presently being done to help this species survive

Option 2:

1. Write a brief story about a farm that illustrates the principles of sustainable agriculture.
2. Discuss the effects of the Green Revolution on the ability to feed an ever growing global population.

Option 3:

Write a story that discusses an example of groundwater pollution.

You will need to include:

1. the source of the pollution
2. who is affected by this
3. how was the pollution discovered
4. how can the situation be cleaned up

Option 4:

1. Create a chart that compares the advantages and disadvantages of the two waste disposal methods discussed in class: sanitary landfills and incineration.
2. Make a list of all the things that your family currently recycles.
3. What items COULD your family recycle that you don't already?
